

CALL FOR PAPERS

ICCCQC 2020
Jun 11-12, 2020
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCCQC 2020 : International Conference on Composite Constructions and Quality Control is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Composite Constructions and Quality Control. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Composite construction
Structural engineering
House building
Deck construction
Composite wood decking
Composite steel deck
Cement-polymer composites
High performance composites
Structural analysis
Composite materials
Composite members
Composite floor construction
Composite bridges

Propped construction
Resistance of section
Continuous beams and slabs
Shear connection
Composite columns
Partially encased steel sections
Composite slabs
Advantages of composite construction
Disadvantages of composite construction
Composite metal decking
Quality control
Scheduling of composite construction
