

CALL FOR PAPERS

ICSVSB 2020
Jun 11-12, 2020
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSVSB 2020 : International Conference on Seismic Vulnerability in Existing Buildings is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Seismic Vulnerability in Existing Buildings. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Seismic vulnerability of existing buildings
Simplified assessment methodologies
Advanced structural modelling techniques
Large-scale vulnerability assessment
Experimental characterization

Surveying, diagnosis and monitoring approaches
Traditional seismic retrofitting strategies
Development, implementation and validation of innovative retrofitting techniques
