

# CALL FOR PAPERS

**ICBSBP 2020**  
**Jun 22-23, 2020**  
**Venice, Italy**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICBSBP 2020 : International Conference on Building Structures and Building Physics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Building Structures and Building Physics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Civil engineering  
Structural engineering  
Building structure  
Nonbuilding structure  
Building structures and technology  
Modern building structure  
Durability and sustainability  
Building physics  
Structural design  
Building design  
Structural pattern  
Design and analysis  
Stability, strength and rigidity of built structures

Mechanical structures  
Construction and structure  
Structural failure  
Base isolation system  
Seismic performance  
Functioning and safety of building structure  
Research, planning and design of permanent and temporary structures  
Construction, inspection and monitoring of permanent and temporary structures  
Maintenance, rehabilitation and demolition of permanent and temporary structures  
Technical, economic, environmental, aesthetic and social aspects of structures  
Residential and recreational developments  
Physical laws and empirical knowledge of the structural performance  
Structural elements to build complex structural systems
