

# CALL FOR PAPERS

**ICHEMS 2020**  
**Jun 22-23, 2020**  
**Venice, Italy**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICHEMS 2020 : International Conference on Harbor Engineering and Marine Structures is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Harbor Engineering and Marine Structures. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Harbor engineering  
Harbor analysis, design and assessment  
Innovative harbor construction  
Harbor technology  
Harbor management strategies  
The marine environment and its effects on port design and construction  
Port (harbor) elements: design principles and considerations

Geotechnical aspects of soil — structure interaction design considerations  
Gravity-type quay walls  
Sheet-pile bulkheads  
Piled waterfront structures  
Offshore deep water terminals  
Modernization of existing marine facilities  
Breakwater design
