

# CALL FOR PAPERS

**ICDDCE 2020**  
**Jul 16-17, 2020**  
**Bali, Indonesia**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICDDCE 2020 : International Conference on Drug Discovery in Cancer Epigenetics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Drug Discovery in Cancer Epigenetics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Drug discovery in cancer epigenetics  
Epigenetic mechanisms and phenomena  
Cancer epigenetics  
Methods and tools for epigenetic drug development  
Drug discovery methods  
Preclinical cancer models and clinical response  
Discovery of biomarkers for drug development  
Networks and consortia for epigenetic drug discovery  
Classes of epigenetic drugs  
DNA Methyltransferase Inhibitors  
Small molecule inhibitors of Histone Deacetylases and Acetyltransferases

The development of selective methyltransferase and demethylase inhibitors  
Bromodomains as anti-cancer targets  
Epigenetic readers interpreting the Lysine Methylome  
Non coding RNAs: clinical and therapeutic applications  
Clinical implications of epigenetic therapy  
Clinical applications of epigenetic drugs  
Efficacy of combined epigenetic therapies  
Predicting and monitoring responses to epigenetic drugs  
Episensitization  
The emerging potential for epigenetic therapeutics in non-cancer disorders
