

CALL FOR PAPERS

ICMR 2020
Jul 16-17, 2020
Bali, Indonesia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMR 2020 : International Conference on Microbiome Research is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Microbiome Research. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Human microbiome
Culturomics
Human microbiome in health
Human microbiome in disease
Human microbial ecology
Human molecular ecology
Functional foods
Probiotics/Prebiotics
Infant microbiome
Novel/Improved methods for Human sample collection/ preservation/DNA extraction, metagenomics, metabolomics, proteomics, transcriptomics
Environmental microbiome

Soil/Rhizosphere microbiome
Plant-Microbe interactions
Animal Microbiome
Microbial ecology
Molecular ecology
Xenobiotics
Novel/Improved methods for environmental sample collection/preservation/DNA extraction, metagenomics, metabolomics, proteomics, transcriptomics
Geo-microbiology, Biofilm interaction, Microbiome of Environmental features (water bodies/caves/air/deserts/rocks)
Computational methods in microbiome
Bioinformatic tools, algorithms, and database
Human Microbiome, Environmental Microbiome, Plant-Microbe interactions, Probiotics and Functional Foods and latest advances in computational approaches in the field of microbiome research
