

CALL FOR PAPERS

ICDERRG 2020
Jul 15-16, 2020
Copenhagen, Denmark

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICDERRG 2020 : International Conference on Distributed Energy Resources and Renewable Generation is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Distributed Energy Resources and Renewable Generation. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- Distributed energy resources
- Data and modeling for distributed energy resources
- Renewable generation
- Smart grids and microgrids
- Power quality
- Optimal planning and operation
- Smart protections
- Power electronics

- Reliability considerations for distributed energy resources
- Cogeneration technologies
- Solar power technologies
- Wind power technologies
- Hydro power technologies
- Waste-to-energy technologies
- Energy storage technologies
- Legal requirements for distributed generation
