

# CALL FOR PAPERS

**ICCCSTA 2020**  
**Jul 17-18, 2020**  
**Helsinki, Finland**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCCSTA 2020 : International Conference on Computerized Control Systems, Technologies and Applications is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Computerized Control Systems, Technologies and Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Computerized control systems  
Control systems  
Computer control  
Applications  
Models  
Analysis  
Technological trends  
Computer based measurement and control systems  
Role of computers in measurement and (process) control  
Basic components of computer based measurement and control systems

Computer based process control system  
Hardware for computer based process control system  
Interfacing computer system with process  
Economics of computer based system for industrial application  
Basic principles of modern methods for design of digital controllers  
Structure of digital controllers  
Computerized protection system  
Discretization and overview of sampled-data systems  
Choice of the sampling frequency for control systems  
Discrete-time models
