The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCPMDA 2020 : International Conference on Controller Performance Monitoring, Diagnosis and Assessment is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Controller Performance Monitoring, Diagnosis and Assessment. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Controller performance monitoring
Control system performance monitoring
Control analysis and design
Control loop problems
Industrial implementations
Operational applications of controller performance monitoring

Performance assessment
Control optimization
Performance assessment measures
Performance monitoring for process controllers
Monitoring feedback loops
Closed loop control
