

CALL FOR PAPERS

ICCSE 2020
Jul 17-18, 2020
Helsinki, Finland

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCSE 2020 : International Conference on Composite Structural Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Composite Structural Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Composite materials in structural engineering
Natural and man-made composites
Composite structures
Fibre composite materials
Civil engineering and composites
Composite materials in structural applications
Behavior and design of structural wood components and systems
Structural mechanics and finite element analysis
Structural dynamics, earthquake engineering, and infrastructure improvement

Structural reliability and probabilistic analysis and design
Non-destructive evaluation of structural materials and systems
Composite materials and structures at high temperatures
Damping in composite materials and structures
Organic matrix composites
Fibre composites
Polymer matrix composites
Aeroelastic behaviour of composites
Composite beams
