

# CALL FOR PAPERS

**ICFCM 2020**  
**Jul 17-18, 2020**  
**Helsinki, Finland**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICFCM 2020 : International Conference on Feedforward Control and Modeling is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Feedforward Control and Modeling. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Feedforward control and controller  
Feedforward control design  
The relation between feedback and  
feedforward control systems  
Feedforward performance and  
analysis  
Feedforward controller algorithms  
Implementation issues  
Recent advances in feedforward  
control systems  
Programmed control  
Path planning and nominal  
trajectory feedforward  
Feedforward of the disturbance

Reference feedforward  
Non-causal inversion  
Input shaping, flexible system  
control  
Iterative update of feedforward  
Physiological feed-forward system  
Gene regulation and feed-forward  
Feed-forward systems in computing  
Long distance telephony  
Automation and machine control
