

CALL FOR PAPERS

ICGTE 2020
Jul 16-17, 2020
Helsinki, Finland

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGTE 2020 : International Conference on Geotechnical and Tunnel Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Geotechnical and Tunnel Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Geotechnical and tunnel engineering
Tunnel and ground engineering
Geotechnical considerations in tunnel design
Geotechnical control of tunnel works
Tunnelling and underground space
Construction optimization for a soft rock tunnel

Water inrush characteristics of roadway excavation
Lining reliability analysis for hydraulic tunnel
Disturbance deformation of an existing tunnel
Energy dissipation characteristics of a circular tunnel
Pressure-arch evolution and control technique
Skewed effect of the pressure-arch in a double-arch tunnel
