

CALL FOR PAPERS

ICRSEBC 2020
Jul 17-18, 2020
Helsinki, Finland

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICRSEBC 2020 : International Conference on Remote Sensing in Ecology, Biology and Conservation is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Remote Sensing in Ecology, Biology and Conservation. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Remote sensing in ecology and conservation
Remote sensing for conservation science
Advanced instruments in remote sensing
Remote sensing of taxonomic, functional and phylogenetic biodiversity
Multi-scale remote sensing
Technological innovation in the interface between ecology and remote sensing

Methodological approaches to link ecological field data and remote sensing data
Real world applications conservation
Supporting biodiversity monitoring from space
Exploiting multi-temporal satellite data
Mapping and monitoring land degradation or land use change
Theories and hypotheses linking remote sensing and ecology
