

# CALL FOR PAPERS

**ICGCCE 2020**  
**Jul 30-31, 2020**  
**Istanbul, Turkey**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGCCE 2020 : International Conference on Graphene Chemistry and Chemical Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Graphene Chemistry and Chemical Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Chemistry of graphene materials  
Wet chemistry of graphene  
Chemical preparation of graphene materials  
Chemical modification of graphene oxide  
Structures and properties of graphene materials  
Functions and practical applications of graphene materials  
Chemical reactions of graphene  
Graphene technology  
Graphene-based hybrid materials

The chemistry of graphene oxide  
Synthesis of graphene oxide  
Synthesis methods of graphene and graphene oxide  
Antioxidant chemistry of graphene-based materials  
Biological and chemical sensors based on graphene materials  
Graphene-based electrode materials  
Graphene-based composite materials  
Graphene-based nanomaterials and their electrochemistry
