

CALL FOR PAPERS

ICMSPQT 2020
Jul 30-31, 2020
Istanbul, Turkey

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMSPQT 2020 : International Conference on Mathematical Sciences, Probability and Queuing Theories is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Mathematical Sciences, Probability and Queuing Theories. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Partial and ordinary differential equations
probability and queuing theory
random processes
real analysis and statistics
singular perturbation theory
stochastic differential equations
stochastic modelling
univalent functions
Advanced calculus and numerical methods
Calculus and trigonometry
Satisfiability modulo theories
Computational methods using high-performance computers
High-performance computing and algorithms

Algebra and algebraic topology
Nonlinear programming models
number theory
numerical analysis
Image, speech and video processing and analysis
pattern recognition and analysis
Linear algebra and programming models
mathematical modelling
Differential equations
Quantifier elimination and decision procedures
Numeric, symbolic, interval and hybrid solution techniques
Solving polynomial systems
Data modeling and analysis
