

# CALL FOR PAPERS

**ICGERGGA 2020**  
**Jul 23-24, 2020**  
**London, United Kingdom**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGERGGA 2020 : International Conference on Geological Engineering, Regional Geology, Tectonics and Geologic Analysis is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Geological Engineering, Regional Geology, Tectonics and Geologic Analysis. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Geological engineering  
Regional geology  
Geological study  
Geologic analysis  
Seismic and sequence stratigraphic analysis  
Large-scale regions  
Geologically significant boundaries  
Sedimentary rocks  
Sedimentary basin system  
Regional geography  
Structural features, and surface forms  
Structural geology  
Measurement conventions

Plane, fabric, fold and deformation conventions  
Stereographic projections  
Rock macrostructures  
Rock microstructures  
Kinematics  
Stress fields  
Computer simulations  
Geological processes, hazards and resources  
Tectonics  
Geodynamic model  
Collision tectonics  
Deformational histories  
Plate tectonics
