

CALL FOR PAPERS

ICGGE 2020
Jul 23-24, 2020
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGGE 2020 : International Conference on Glacial Geomorphology is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Glacial Geomorphology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- | | |
|----------------------------------------------------------|--------------------------------------------|
| Glacial geomorphology | Landforms of glacial erosion |
| Glacial geomorphology and geographic information systems | Glacial debris entrainment and transport |
| Field techniques in glaciology and glacial geomorphology | Glacial sedimentation on land |
| Recent trends in glacial geomorphology | Landforms of glacial deposition on land |
| Time-space representations and glacial geomorphology | Glaciolacustrine landforms |
| Spatial analysis and geostatistics | Glaciomarine landforms |
| Data representation and GIS in glacial geomorphology | Glacial sedimentation in water |
| Mass balance and the mechanisms of ice flow | Landforms of glacial deposition in water |
| Patterns and rates of ice flow | Palaeoglaciology |
| Glacier response to climate change | The methods used in palaeoglaciology |
| Glacier hydrology | The key landforms used in palaeoglaciology |
| The processes of glacial erosion | |
