

CALL FOR PAPERS

ICHGR 2020
Jul 23-24, 2020
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICHGR 2020 : International Conference on Hydrogeology and Groundwater Resources is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Hydrogeology and Groundwater Resources. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Hydrogeology	Storage parameters
The properties of water	Flow calculations and applications
Water management	Well hydraulics
Distribution of water on the earth	Aquifer testing
Analytic methods	Horizontal radial flow
Numerical methods	Flow systems and regional groundwater flow
Models	Flow modeling
The hydrologic cycle	Surface water
Groundwater	Hydraulic conductivity
Distribution of water in the subsurface	Contaminant transport properties
Groundwater flow	Hydrodynamic dispersion
Fluid potential and kinetic energy	Molecular diffusion
Flow equations	Retardation by adsorption
