

# CALL FOR PAPERS

**ICCACSE 2020**  
**Jul 13-14, 2020**  
**Ottawa, Canada**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCACSE 2020 : International Conference on Computer-Aided Control System Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Computer-Aided Control System Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Computer-aided control systems	Analysis and control of ALSTOM
Applied control engineering	Gasifier problem
Computer-aided control system design	Gasifier system description and notation
Control systems design	Inherent properties analysis
MATLAB and Simulink	Control structure design
Technological developments	Gasifier system analysis
Computing hardware and system software	Model order reduction (MOR)
High level languages	Linear quadratic regulator (LQR)
Graphical displays	Linear quadratic Gaussian (LQG)
Quality numerical software	H-infinity optimization
Simulation languages	H2 optimization
User interfaces	Comparison of controllers
	Comparison of all controllers
