

CALL FOR PAPERS

ICMGP 2020
Jul 13-14, 2020
Ottawa, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMGP 2020 : International Conference on Map Generalization Procedures is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Map Generalization Procedures. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Map generalization
Generalization of geographic information
Map generalization methods
Generalization algorithms
Generalization procedures
Selection and simplification
Combination and smoothing
Enhancement and displacement
Exaggeration and aggregation
GIS and automated generalization

Scaling law
The representation-oriented view
The process-oriented view
The ladder-approach
The star-approach
Evaluation in the map generalization process
Map generalization technology
Automated generalization in a map production environment
Generalization of geographical networks
