

CALL FOR PAPERS

ICNSL 2020
Jul 13-14, 2020
Ottawa, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICNSL 2020 : International Conference on Natural Slopes and Landslides is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Natural Slopes and Landslides. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Analysis of Debris Flows and
Mudflows
Behavior of Soil and Rock for Slope
Stability Analysis
Capacity Development for Landslides
Mitigation
Case Histories of Natural and Man
Made Slope Failures
Climate Change and Land Use Impact
on Landslides
Design Aspects for Slope Stability
Dynamic Behavior of Soils and Rock
for Slope Stability Analysis
Earthquake and Liquefaction Induced
Landslides
Education on Landslides
Engineering Geology and the
Environment
General Landslides Studies
Geoengineering
Geological Sciences

Geoscientists and Engineers
Geosynthetics
Ground Improvement for Slope
Stabilization
Insitu Testing and Monitoring for
Identification and Study of Slope
Movement
Landslides Inventory and Landslide
Hazard Zonation
Landslides in River, Coastal and
Submarine Environments
Large Dams
Mechanism of Slope Failures in
Soils and Rocks
Modeling of Slopes and Application
and Development of Numerical
Analysis
Monitoring, Prediction and Warning
of Landslides
Outlook for New Technology in Slope
Stabilization
Petroleum Engineers
Physical Modeling and Material
Testing for Slope Stability
Analysis
