

# CALL FOR PAPERS

**ICPE 2020**  
**Jul 13-14, 2020**  
**Ottawa, Canada**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICPE 2020 : International Conference on Political Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Political Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Political decision making under uncertainty  
New technologies in politics  
Application of engineering to politics  
Application of computer science to politics  
Application of mathematics to politics  
Application of natural science to politics  
Application of operations research to politics  
Application of optimization methods to politics  
Uncertainty management in political decision making  
Application of computational intelligence methods to politics  
Application of fuzzy logic to politics  
Application of neural computing to politics  
Application of neural networks to politics

Application of evolutionary computation to politics  
Application of genetic algorithms to politics  
Application of knowledge-based systems to politics  
Application of machine learning methods to politics  
Application of pattern recognition to politics  
Application of data mining to politics  
Application of analytics to politics  
Application of data integration to politics  
Application of data analysis to politics  
Application of data modeling to politics  
Application of exploratory data analysis to politics  
Application of confirmatory data analysis to politics  
Application of predictive analytics to politics
