

CALL FOR PAPERS

ICPEM 2020
Jul 13-14, 2020
Ottawa, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICPEM 2020 : International Conference on Precision Engineering in Manufacturing is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Precision Engineering in Manufacturing. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Precision engineering	High precision machining
Controls and mechatronics	Machine tools
Metrology systems and techniques	Machining control
Precision design of instruments and machines	Measurement engineering
Precision manufacturing machines and technologies	Mechatronics
Micro and nano technologies	Medical devices
Characterization, data reduction and applications of measurement science	Mems/nems
Advanced moulding and forming	Non-conventional machining
Cad/cam technology	Precision devices
Characterization: metrology systems, instruments and techniques	Service engineering
Design and build of ultra-precision machine systems	Tribological systems
Design engineering	Ultra/nano-precision manufacturing
Green manufacturing	Other related technologies
