

CALL FOR PAPERS

ICRTCCS 2020
Jul 13-14, 2020
Ottawa, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICRTCCS 2020 : International Conference on Refrigerated Transport and Cryogenic Cooling Systems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Refrigerated Transport and Cryogenic Cooling Systems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Refrigerated transport	Eutectic systems
Control of refrigerated transport systems	Cryogenic cooling systems
Refrigerated transport and environment	Energy consumption for refrigerated road transport
Refrigeration system for refrigerated trucks	Refrigerated transport of fruit using sensor networks
Simulation and analysis of refrigerated transport vehicles	Modelling of food transportation systems
Temperature control and legislation requirements for refrigerated transport	Quality, safety and sustainability in food distribution
Transport temperature requirements of food products	Food transportation safety
Food transport refrigeration vehicles	Possible alternative technologies for transport refrigeration
Refrigeration units	Absorption systems for food transport refrigeration
Air delivery systems	Thermoelectric power generation
