

CALL FOR PAPERS

ICSCDKC 2020
Jul 13-14, 2020
Ottawa, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSCDKC 2020 : International Conference on Structural Concrete Design and Key Characteristics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Structural Concrete Design and Key Characteristics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Structural concrete design	Construction and the environment
Good practice in concrete design	Embodied energy
Reinforced concrete design	Energy required for concrete
Concrete structures	Corrosion of reinforced concrete
Reinforced concrete	Corrosion prevention
Design methods in reinforced concrete	Structural design
Sustainable construction	Reinforced concrete
Possibilities in concrete structure	Use in construction
Technical concepts	Behavior of reinforced concrete
Unreinforced concrete	Materials
Design basis for reinforced concrete	Key characteristics
Reinforced and prestressed concrete	Principles and practice
Strut and tie modeling	Mechanism of composite action of reinforcement and concrete
