

CALL FOR PAPERS

ICSGBA 2020
Jul 13-14, 2020
Ottawa, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSGBA 2020 : International Conference on Sedimentary Geology and Basin Analysis is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Sedimentary Geology and Basin Analysis. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Sedimentary geology
Sedimentary geology, geomorphology,
and paleontology
Modern sediments and ancient
sedimentary rocks
Fundamental materials, features,
and processes
Textures of siliciclastic sediments
and sedimentary rocks
Particle size, particle shape, and
particle packing
Mechanics of sediment transport
Survey of siliciclastic sedimentary
rocks
Sandstones, conglomerates and
shales
Carbonate sediments and sedimentary
rocks
Siliciclastic and carbonate
diagenesis
Paleontology, with special
reference to fossils in sedimentary
rocks

Modern and ancient depositional
environments
Modern and ancient sedimentary
environments
Sediment fluxes
Sediment-organism interaction
Sequence stratigraphy
Stable isotope geochemistry
Environmental sedimentology
Geology of oil and natural gas
Petroleum exploration and
development
Basin modeling and reservoir
evaluation
Geochemical and geophysical studies
