

# CALL FOR PAPERS

**ICSSST 2020**  
**Jul 13-14, 2020**  
**Ottawa, Canada**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSSST 2020 : International Conference on Superconductivity, Superconductor Science and Technology is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Superconductivity, Superconductor Science and Technology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Superconductor science and technology

Superconductivity and zero electrical resistance

Superconductors and superconducting materials

Types of superconductors

Superconductive technology applications

Applications of superconductors

Superconducting magnets

Superconducting

Magnetic properties of superconductors: modelling, experiment and theory

Superconductor terahertz science and applications

High temperature superconductors

Superconductivity for the power grid

Zero electrical DC resistance

Superconducting phase transition

Meissner effect

London moment

High-temperature superconductivity
