

CALL FOR PAPERS

ICSTSM 2020 Jul 13-14, 2020 Ottawa, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSTSM 2020: International Conference on Sustainable Transportation Studies and Models is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Sustainable Transportation Studies and Models. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Sustainable transportation Transportation engineering Principles and visions of sustainable transportation Advanced transportation engineering and inventions Sustainable transportation, common and current problems Sustainable transportation systems, policies, and technologies Sustainable transportation infrastructure Vehicle operations Sustainable transportation and maintenance Artificial transportation and sustainability

Transportation and social sustainability
Carbon neutral fuel
Electric and Green vehicles
Plug-in hybrid
Road traffic safety
Sustainable transport
Transportation demand management
Sustainable freight and delivery systems
Vehicle-free city planning
Pedestrian and bicycle friendly design
