

CALL FOR PAPERS

ICEIA 2020
Jul 20-21, 2020
Paris, France

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEIA 2020 : International Conference on Energy Informatics and Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Energy Informatics and Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Energy informatics
Energy informatics for green cities
Smart grid communications, control, optimization and cyber security
IoT/Fog/cloud computing for smart grid
Green computing and energy efficiency
Big data analytics for smart energy management
Advanced information architectures for green cities
Advanced informatics techniques for green cities

Advanced cyber security for green cities
Advanced computing and control for green cities
Advanced informatics applications for green cities:
Advanced smart buildings and smart houses
Advanced energy trading and market
Advanced informatics for renewable energy management and forecasting
Next-generation wireless communications for green cities
Smart grids/energy harvesting/energy-transfer assisted informatics networks
