CALL FOR PAPERS

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICTHSCOD 2020 : International Conference on Technologies and Humanities for Smart Cities and Open Data is
the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Technologies and Humanities for Smart Cities and Open Data. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

How current and future urban trends can be governed, improving the dynamic synergies between a city's material and immaterial elements, both hard (green infrastructure and architecture) and soft (big data, IoT/IoE, sensor networks, blockchains, etc.)

How to govern urban and regional relations without compromising the city-land synergies (between city, territory and society), in terms of mobility, distribution logistics and ecological footprint

How "smart city policies" have an impact on the city and regional economies, making cities competitive nationally and internationally without losing their local characteristics through collective creativity

How to govern urban and regional relations between advanced technology and metamorphosis of smart city (competitiveness for events, social cohesion, urban regeneration)

How communities respond to changes and influence changes in the Smart City, by means of participation, inclusion and creativity
