

CALL FOR PAPERS

ICASCEA 2020
Jul 23-24, 2020
Rome, Italy

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICASCEA 2020 : International Conference on Advances in Sustainable Civil Engineering Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advances in Sustainable Civil Engineering Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Sustainable civil engineering
Environmental engineering for civil systems
Systems approaches in engineering
Life cycle issues in civil engineering
Future change and infrastructure monitoring
Circular economy and civil infrastructure
Multiple use infrastructure
Low carbon construction
Processing and managing field data
Reliability in civil engineering
Innovation and entrepreneurship in delivering civil infrastructure

Sustainable development
Sustainability in civil engineering
Civil and structural engineering
Sustainability in geotechnical engineering
Recycled and demolished materials for construction
Recycled concrete, recycled brick, recycle rubble
Waste residues in construction and local materials
Rammed earth and similar products
Cementless concrete materials
Agriculture waste for concrete and other applications
