

# CALL FOR PAPERS

**ICCSE 2020**  
**Jul 23-24, 2020**  
**Rome, Italy**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCSE 2020 : International Conference on Computer Software Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Computer Software Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Computer software engineering  
Computer engineering  
Computational intelligence  
Artificial intelligence and pattern recognition  
Neural networks and genetic algorithms  
Expert systems, and support vector machines  
Machine intelligence and information fusion  
Machine learning and knowledge discovery  
Multimedia and graphics  
Encoding and decoding  
Transmission scheme over networks  
Virtual reality, 3-d imaging and rendering algorithm  
Software and hardware implementation

Computer vision and image processing  
Computer graphics and visualization  
Information security  
Protocols for cryptography  
Mathematical foundation  
Software and hardware implementation  
Security applications and management  
Software engineering  
Computer and network systems  
Distributed and parallel computing  
Grid computing  
Database systems and web-based services  
It for anti-terrorist technology innovations
