

CALL FOR PAPERS

ICAPQP 2020
Jul 06-07, 2020
Singapore, SG

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAPQP 2020 : International Conference on Animal Proteomics and Quantitative Proteomics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Animal Proteomics and Quantitative Proteomics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Identification of animal proteins in diseased domestic animals, poultry, and aquaculture-related issues
Experimental reports on protein expressional level influence of drugs, vaccines, and induced diseases and infections
Proteomics investigations of milk, animal fluids, and animal products
Application of proteomics in rapid testing on animal product adulterations, especially milk and meat products

Role of protein level investigations on animal feeds and influence on commercial ventures such as poultry, animal husbandry, and aquaculture
Development of protein related therapeutic agents, designing proteome-based newer vaccine candidates and diagnostic tools
Role of proteomics in decision and policy making of animal related issues
