

CALL FOR PAPERS

ICFCSCM 2020
Jul 06-07, 2020
Singapore, SG

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICFCSCM 2020 : International Conference on Flight Control Systems and Control Mechanisms is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Flight Control Systems and Control Mechanisms. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Flight control systems
Flight control system design
Aircraft control systems and control surfaces
Mechanical flight control systems
Advances in control components
Feedback systems
Flight control computers and electronics
Aircraft control devices and systems
Intelligent flight control systems
Unmanned vehicles and systems
Advanced aircraft technologies

Machine learning techniques for flight control systems
Aircraft flying qualities and flight control
Intelligent flight control and controllers
Fault analysis for flight control systems
Control surfaces
Control mechanisms
Powered control
Flight control systems
Fly-by-wire control
Nonlinear dynamics and aero/
Mechanical instability
