

CALL FOR PAPERS

ICCEMLT 2020
Jul 16-17, 2020
Stockholm, Sweden

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCEMLT 2020 : International Conference on Control Engineering and Machine Learning Techniques is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Control Engineering and Machine Learning Techniques. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Machine learning and control engineering
Machine learning techniques for complex and stochastic systems
Making prediction and forecasting for control applications
Automatically learning, artificial intelligence, and intelligent optimization
Applications of neural networks to building advanced control systems
Limitations of machine learning and implementations
Machine learning techniques and feedback systems
Modern control techniques and interdisciplinary research

Supervised learning
Unsupervised learning
Semi-supervised learning
Graph-based methods
Co-training
Reinforcement learning
Deep learning
