

# CALL FOR PAPERS

**ICCSIT 2020**  
**Jul 16-17, 2020**  
**Stockholm, Sweden**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCSIT 2020 : International Conference on Control Systems and the Internet of Things is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Control Systems and the Internet of Things. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Control systems and the internet of things  
Internet of things for control technologies  
Industrial internet of things  
Big data and the future of control systems architecture  
Big data applications in industrial control systems  
Dependable control systems with internet of things  
Industrial internet of things (IIoT)  
Novel architectures for IIoT  
Novel concepts, principles, and mechanisms for IIoT  
Big data analysis for IIoT  
Semantic IIoT  
Cloud, fog, and edge computing for IIoT  
Energy-aware services computing in IIoT

In-network programming for the IIoT  
Context-awareness in IIoT  
Security and privacy issues in IIoT  
Applications and use cases in IIoT  
Novel business models driven by IIoT  
Architectures, protocols and standards  
Energy efficient communication  
Fog and cloud computing architectures and technologies  
Performance engineering and models  
Security, privacy and reliability  
Industrial IoT infrastructure, applications and services  
Industrial analytics architectures, algorithms and applications  
Network function virtualization and chaining
