

CALL FOR PAPERS

ICEH 2020
Jul 16-17, 2020
Stockholm, Sweden

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEH 2020 : International Conference on Environmental Hydraulics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Environmental Hydraulics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Environmental hydraulics
Hydrodynamic modelling
Environmental information systems
Sustainable water management
Jets and plumes
Sea outfalls
Diffusion and dispersion
Interaction between fluid mud and water waves
Heat transport
Chemical transport
River water quality modeling

Estuarine hydraulics
Ecohydrodynamics
The mathematical theory of circulation models
The vertically-integrated two dimensional models
Three-dimensional circulation models
Quasi three dimensional circulation models
Particle trajectory and pollutant transport models
Numerical analysis of coarse fine grid models
Numerical analysis of coarse fine grid models
Model applications to the great lakes
