

# CALL FOR PAPERS

**ICACSC 2020**  
**Jul 14-15, 2020**  
**Tokyo, Japan**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICACSC 2020 : International Conference on Autonomous Control Systems and Controllers is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Autonomous Control Systems and Controllers. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Autonomous control systems  
Modeling and analysis of autonomous control systems  
Characteristics of autonomous control systems  
Mathematical models for autonomous control systems  
Monitoring and diagnosis of autonomous control systems  
Functions of autonomous control systems  
Learning and neural networks  
Advanced algorithms

Intelligent autonomous control  
Autonomous controllers  
Autonomous control architectures  
Autonomy, control and technology  
Fault tolerant control systems  
Unmanned aerial and ground vehicles  
Cognitive developmental robotics  
Advanced control schemes
