

CALL FOR PAPERS

ICGMP 2020
Jul 14-15, 2020
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGMP 2020 : International Conference on Current Good Manufacturing Practices is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Current Good Manufacturing Practices. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Manufacturing engineering
Manufacturing practices
Good manufacturing practice
Current manufacturing practices
Agricultural practices
Laboratory practices
Clinical practices
Regulatory practice
Distribution practice
Transportation practice
Research, design and development of systems
Processes, machines, tools, and equipment
Raw materials

Modern developments
Modern tools
Mechanics
Automation
Robotics
Statics and dynamics
Strength of materials and solid mechanics
Instrumentation and measurement
Engineering design and graphics
Circuit analysis
Identify the most cost-effective material handling
Develop and implement fabrication processes for nano-/micro-devices
Develop the best assignment of machines and equipment
