

CALL FOR PAPERS

ICRMTA 2020
Jul 16-17, 2020
Toronto, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICRMTA 2020 : International Conference on Remote Monitoring Technologies and Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Remote Monitoring Technologies and Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Remote monitoring technologies and control systems

Wireless remote monitoring and control

Remote monitoring and control of machinery and devices

Industrial remote monitoring and control

Wireless systems for remote monitoring and control

Real-time monitoring and advanced control algorithms

Remote monitoring and control solution for automation systems

Internet based remote monitoring and control system

Pc-based remote control applications in robotics

Wireless communication technologies for remote monitoring and control

Android devices in remote monitoring and control

Remote monitoring through ethernet

Remote monitoring through GSM

Sensors, detectors, and transmitters

Remote monitoring and control software, apps, and tools
