

CALL FOR PAPERS

ICMMM 2020
Jul 30-31, 2020
Vienna, Austria

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMMM 2020 : International Conference on Molecular Modelling and Mechanics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Molecular Modelling and Mechanics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Molecular engineering
Molecular modelling
Molecular model
Software for molecular mechanics modeling
Software for nanostructures modeling
Model or mimic the behaviour of molecules
Molecular dynamics
Molecular design software
Molecular mechanics
Coordinate representations
Design and testing of molecular properties, behavior and interactions
Molecular engineering applications
Materials, systems, and processes for specific functions

Molecular structure
Computational chemistry
High performance computing
Statistical mechanics
Theoretical chemistry
Consumer products
Energy harvesting and storage
Environmental engineering
Immunotherapy
Synthetic biology
Techniques and instruments used
Computational and theoretical approaches
Microscopy
