

# CALL FOR PAPERS

**ICBSDCSAS 2020**  
**Jul 27-28, 2020**  
**Zurich, Switzerland**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICBSDCSAS 2020 : International Conference on Bioenvironmental Control Systems and Agricultural Structures is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Bioenvironmental Control Systems and Agricultural Structures. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Bioenvironmental systems

Bioenvironmental systems design

Heat and mass transfer

Systems for heating and cooling agricultural structures

Physiological requirements for livestock and bioproducts

Design of environmental modifications

Design of livestock wastes and control systems

Animal/environment interactions

Techniques for analyzing thermal conditions and balances

Principles of air movement, distribution and control

Basics of livestock waste collection and treatment

Steady state thermal analysis

Steady state energy and mass balances

Livestock waste disposal

Composting

Nutrient management

Air quality
