

CALL FOR PAPERS

ICCG 2020
Jul 27-28, 2020
Zurich, Switzerland

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCG 2020 : International Conference on Chemistry of Graphene is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Chemistry of Graphene. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Chemistry of graphene materials
Wet chemistry of graphene
Chemical preparation of graphene materials
Chemical modification of graphene oxide
Structures and properties of graphene materials
Functions and practical applications of graphene materials
Chemical reactions of graphene
Graphene technology
Graphene-based hybrid materials

The chemistry of graphene oxide
Synthesis of graphene oxide
Synthesis methods of graphene and graphene oxide
Antioxidant chemistry of graphene-based materials
Biological and chemical sensors based on graphene materials
Graphene-based electrode materials
Graphene-based composite materials
Graphene-based nanomaterials and their electrochemistry
