

CALL FOR PAPERS

ICENCM 2020
Aug 20-21, 2020
Bangkok, Thailand

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICENCM 2020 : International Conference on Electromagnetic, Nanophotonic and Complex Materials is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Electromagnetic, Nanophotonic and Complex Materials. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Electromagnetic, Nanophotonic and Complex Materials
Metamaterials and negative index materials
Metatronics and graphene metamaterials
Acoustic metamaterials
Plasmonics and nanophotonics
Plasmon-enhanced photovoltaics, photocatalysis, and solar fuels
Nanobiophotonics

Hybrid and quantum materials
Near-field optics and nano-optics
Transformational electromagnetics
Photonic crystals
Chiral and bianisotropic materials
FSS, HIS and Extraordinary transmission
Analytical and numerical modelling
