

# CALL FOR PAPERS

**ICCECI 2020**  
**Aug 21-22, 2020**  
**Kuala Lumpur, Malaysia**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCECI 2020 : International Conference on Control Engineering and Computational Intelligence is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Control Engineering and Computational Intelligence. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Computational intelligence in control  
Computational methods in systems and control theory  
Computational complexity in systems and control  
Neural network control  
Fuzzy control  
Reinforcement learning in feedback control systems

Brain machine interfaces  
Mathematical algorithms and methods  
Computer-based optimization  
Control of physical-technical processes  
Dynamical systems and processes
