

# CALL FOR PAPERS

**ICACB 2020**  
**Aug 20-21, 2020**  
**London, United Kingdom**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICACB 2020 : International Conference on Applied Cereal Biotechnology is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Applied Cereal Biotechnology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Cereal biotechnology

Genetic transformation of wheat and barley

Genetic transformation of rice and maize

Product development in cereal biotechnology

Using biotechnology to add value to cereals

Molecular biological tools in cereal breeding

Risk assessment and legislative issues

Current practice in milling and baking

Current practice in malting, brewing and distilling

Biotechnology of major cereals

Genetic transformation of maize

Sorghum genetic transformation

Wheat biotechnology

Rice genetic modification technology

Genome editing in cereals

Engineering cereal endosperm

Cereal genomics

Chemistry of cereal grains

Advances in cereal genomics and applications in crop breeding

Micropropagation in plants

Plant tissue culture and biotechnology
