

CALL FOR PAPERS

ICCGCC 2020
Aug 20-21, 2020
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCGCC 2020 : International Conference on Climatic Geomorphology and Climate Change is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Climatic Geomorphology and Climate Change. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Climatic geomorphology
Geomorphology and global environmental change
Morphoclimatic zones
Morphogenetic regions
Landforms and geomorphic processes
The intensity, frequency and duration of precipitation
Intensity, direction and power of wind
Development of landscapes under different climatic conditions
Geomorphic processes and internal forces
Desert geomorphology
Periglacial geomorphology

Tropical geomorphology
Humid landscapes, hillslope processes and fluvial processes
Arid landscapes, weathering processes and sand desert
Periglacial landscapes, frozen ground processes and forms
The geographic cycle in periglacial regions
Glacial landscapes, glacial landforms and glacial climates
Geomorphology and climate change
Geomorphic responses to climatic change
Climate change in glacial and periglacial regions
Glacial transportation and sedimentation
Climate change in arid and tropical humid regions
