

CALL FOR PAPERS

ICCSI 2020
Aug 20-21, 2020
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCSI 2020 : International Conference on Civil Systems and Infrastructures is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Civil Systems and Infrastructures. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Civil systems	Next generation power grids
Civil systems engineering	Electric power cars, and renewable energy sources
Structural engineering and structural mechanics	Air traffic control and management system
Hydrology, water resources, and fluid mechanics	Modernization of waterways
Building systems	Sustainable development for high-density urban areas
Construction engineering and management	Renewable energy generation
Geotechnical engineering and geotechnical mechanics	Vehicle usage and carbon emissions
Environmental engineering
