

# CALL FOR PAPERS

**ICSFCTC 2020**  
**Aug 20-21, 2020**  
**London, United Kingdom**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSFCTC 2020 : International Conference on State-Feedback Control Technologies and Controllers is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of State-Feedback Control Technologies and Controllers. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

State-feedback control systems  
Structures and properties of  
state-feedback control systems  
State-feedback control in the  
frequency domain  
Steady state of the closed-loop  
system  
State-feedback control with  
integrator  
Design of state-feedback  
controllers by pole placement  
Design of a system in controller  
canonical form

Design of a system not in a  
canonical form  
Design using Ackermann's formula  
State reconstruction using  
observers  
Structure of an observer  
Design of observers  
Combined observer-controllers  
Example of a state-feedback control  
system
