

CALL FOR PAPERS

ICWTFA 2020
Aug 20-21, 2020
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICWTFA 2020 : International Conference on Wireless Technologies in Factory Automation is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Wireless Technologies in Factory Automation. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- Wireless factory automation
- Wireless communication for factory automation
- Reliable, high performance wireless systems for factory automation
- Industrial wireless systems
- Wireless systems for industrial environments
- High-performance wireless networks for critical industrial control
- Wireless industrial communication for sustainable manufacturing

- 5g and mobile networks for industrial communications
- Industrial wireless systems measurements, simulation, and testing
- Selection and deployment of wireless technologies in industry
- Standardization of industrial wireless systems
- Security for industrial wireless systems
- Wired and wireless convergence in industrial systems
- Practical guidelines for field deployment
